

As Web Developer (Backend)

in Berlin

Driven by the vision to improve well-being and therapy outcomes of cancer patients, we are creating a digital companion for cancer patients. As Web Developer, you will become a key player in our dynamic team. We are a spirited telemedicine startup with offices in Frankfurt and Berlin and the passion to making a difference for cancer patients. We care! – Do you?

Responsibilities, i.e. some of the stuff you would do

- Bring your ideas to the table and contribute to the development of our product using state of the art technologies
- Joint responsibility for development and operation of the platform
- Work on healthcare applications with an immediate impact on cancer patients

Your ideal profile

It would be great if you would have most of the following requirements covered:

- You have experience in developing web applications, preferably with Python, Django and PostgreSQL in a Cloud infrastructure
- You have sound knowledge in test-driven development, security and resilience for high-quality, highly available applications
- You enjoy working in a small, effective cross-functional team
- You already live in Germany and communicate fluently in English - German is a plus

What we offer

- A dedicated environment to help people with cancer and improve outcomes of cancer therapy
- Ownership in what we do
- Flat hierarchies, teamwork and transparent communication
- Competitive salary

Are you Interested?

Does this sound exciting to you? Do you want to join a fast-growing startup with the vision to improve patients' lives? Send your application to jobs@fosanis.de - even if **this** is not the job for you – we are hiring for other positions as well! We are looking forward to getting to know you!
